Ideal Standard

We're all in an Ideal Standard world

Ideal Standard is one of the world's leading bathroom product manufacturers, with over 9000 colleagues working in 18 production facilities in over 60 countries.

This explains why, when you visit a bathroom in either a family home, a commercial property or a healthcare facility, you won't be surprised to see our name on the ceramics or fittings.

Over the last 100 years, we have worked with world class designers and the latest technology to make Ideal Standard the standard bathroom products.

Only Ideal Standard replacement parts are as good as new

Like any moving parts, there are components in Ideal Standard and Armitage Shanks products that may occasionally need replacing.

As a manufacturer we pride ourselves on being able to provide our customers with the right part at the right time.

They are made to exactly the same specifications as the parts that were fitted when the ceramics or fittings were newly manufactured. Not only are they perfectly compatible, they were specified by the Ideal Standard design and engineering team. So, performance is nothing to be concerned about.

Our dedicated customer care team is there to help you select the correct part and supply it when you need it, backed by our comprehensive 12 month guarantee.

It's the only way to ensure replacement parts are as good as the originals.
